Outline

- DTaP-containing vaccines
 - Pentacel Vaccine (DTaP-IPV-Hib)
- Bexsero update
- Adult vaccine update
- CDC Vaccine Supply/Shortage Page

Pentacel (DTaP-IPV-Hib)

- In December 2015, Sanofi Pasteur announced a manufacturing delay with Pentacel vaccine
- As a result, Sanofi Pasteur is only able to meet approximately 70% of historical Pentacel vaccine demand
 - At this time, sufficient supplies of the Sanofi's individually administered vaccines (DTaP, Hib, and IPV) are available to address the gap in Pentacel supply
- Sanofi anticipates resolution of this Pentacel delay in Q4 2016

Bexsero

- GSK is currently on backorder for both presentations of Bexsero (1-pack and 10-pack)
- GSK anticipates beginning to clear back orders in October
- GSK anticipates that shipping delays product will continue throughout Q4 of 2016
- GSK maintains a medical reserve that can be used to fill public or private orders in the event of an immediate need such as an outbreak
 - The reserve is currently still available for filling orders)

Adult Vaccine Update

- Two vial presentations of Merck's adult vaccines are currently unavailable for shipping
 - Single dose Pneumovax vial
 - Adult Vaqta vials (10-pack)
- Availability for both products is expected to resume the week of November 17
- Until that time, Merck has sufficient supply of the syringe presentation of these two adult vaccines available to meet the historical demand for both the vial and syringe presentations
